PREAMBLE

Natural Products are characterized by the presence of bioactive molecules with useful properties in the fields of nutrition, pharmacy, cosmetology, agronomy and the environment. This academic national Webinar with socio-economic fallout is organized by the Natural Products Laboratory (LAPRONA).

OBJECTIVES

- ◆ To make known the innovative research themes of Natural Products and their applications.
- ◆ Establish collaborations with universities, research centers and national laboratories to promote multidisciplinary in the service of biological sciences.
- ◆ Create a space for scientific exchange between researchers and young doctoral students at the national level.
- ◆ Presentation of numerical approaches to the modeling of bioactive molecules in different sectors : Food, Medical and Pharmaceutical.

TOPICS

1. Extraction, separation and bioactive molecules identification.
2. Application of bioactive compounds and formulation.
3. Docking of bioactive molecules.
4. Bioactive compounds and healthy.
5. Recovery of by-products from food industrie.
